Sub Psychological Warfare and the news.

We should make our most aggressive psychological warfare of informative kind in battle lulls; at other times the news speaks for itself -- (as relayed by white). During lulls, rumor, black radio, pamphlets should carry out aggressive divertive pseudo-news campaigns dealing with personalities, etc. The cream of such materials should be reserved to lull periods.

On the other hand, major military news events should be immediately followed by black psychological warfare campaigns designed to exploit them, e.g., when Axis out of Tunis, spread local rumors of landings at neighboring points in Italy -- rumors that Mussolini asked for peace but was immediately placed under custody, etc.

Note: In our plans, must get the time dimension

(Write a paper on Time -- news relations to planning.)
